

## **JOB OPPORTUNITY: IT SECURITY ANALYST**

Pattison Sign Group is a successful, North American Company growing organically and through ongoing acquisitions. It is one of the world's largest sign and physical branding element companies, with eight (8) manufacturing facilities, five (5) sales and operations offices and over one thousand employees across North America. In addition to the Pattison Sign Group brand, the following respected brands are part of the PSG family: Teksign, Provincial Sign Systems, Bestworth Rommel, DEX powered by PSG, FBC and Chandler Signs.

PSG is committed to absolute customer satisfaction and ultimate quality in its products and services. The culture of the company focuses on performance and accountability and supports employee empowerment and development. The company operates independently within The Jim Pattison Group, headquartered in Vancouver, and comprised of over 605 locations worldwide. The Jim Pattison Group is broadly based across the automotive, media, packaging, food sales and distribution, magazine distribution, entertainment, export, and financial industries. With sales of over \$15 billion in 2022 and more than 49,500 employees, the Jim Pattison Group is the second-largest private company in Canada. We are looking for an IT Security Analyst to be based at our New Brunswick office.

### **OVERVIEW**

At PSG, we rely on our IT systems to power the solutions that help our employees and consumers in North America. We are seeking an experienced IT Security Analyst who can join us on this journey, using his or her technological skills to make us more efficient. Reporting and collaborating closely with the Director of Information Technology, the IT Security Analyst is responsible to manage daily operations, ensure data security and analyze our current systems and assets, recommend, and implement solutions and upgrades. Our ideal candidate would have an extensive knowledge of network maintenance, cybersecurity, experience supervising staff, and advanced industry knowledge to keep us on the forefront.

### **KEY RESPONSIBILITIES**

- Identifying vulnerabilities in the current network.
- Developing and implementing a comprehensive plan to secure the computing network.

- Monitoring network usage to ensure compliance with security policies.
- Keeping up to date with developments in IT security standards and threats.
- Conducting penetration testing to identify potential vulnerabilities.
- Collaborating with management and the IT department to improve security.
- Documenting any security breaches and assessing their damage.
- Educating colleagues about security software and best practices for information security. Ensure network components meet needs and work.

## EXPERIENCE

- Bachelor's degree in IT, computer science, or a related field.
- Strong leadership and management skills.
- A minimum of 6 years of relevant experience.
- Experience or certification in IT Security and User awareness & training

## COMPETENCIES

- Strong leadership abilities and collaboration with business managers, IT engineers, and IT operations staff required.
- The ability to interact with IT personnel, establish strong relationships at all levels and across all business units and organizations.
- Exhibit excellent analytical skills, the ability to manage multiple projects within tight deadlines, and work well in a demanding, dynamic environment while meeting overall objectives.
- Project management skills include financial/budget management, scheduling, and resource management.
- Capable of leading and motivating cross-functional, interdisciplinary teams to achieve tactical and strategic goals.
- A thorough understanding of the commercial implications of security tools, technologies, and policies.
- Bilingual, excellent oral, written, and interpersonal communication skills both in English and French.
